

About Granite

About Marble

The name of marble is derived from its abundance in Dali, Yunnan, China. The marble is very beautiful after polishing. It is mainly used for processing into various shapes and plates, which are used as the walls, floors, platforms and columns of buildings. It is also commonly used as materials for monumental buildings such as monuments, towers, and statues. Marble can also be carved into practical works of art such as arts and crafts, stationery, lamps and utensils.

The subjective attributes are: pattern, with high compressive strength and good physical and chemical properties, easy to process, with the development of economy, the scope of application continues to expand, the amount is increasing, and it plays an important role in people's lives. Especially in the past ten years, large-scale mining, industrial processing, and international trade have made decorative panels enter the building decoration industry in large quantities, not only for luxurious public buildings, but also for home decoration. It is also widely used in the manufacture of exquisite appliances, such as furniture, lamps, smoking sets and artistic sculptures. Some can also be used as alkali-resistant materials. Crushed stones and leftover materials produced during mining and processing are also commonly used in the production of artificial stone, terrazzo, stone rice, and stone powder, and can be used as fillers in coatings, plastics, rubber and other industries.

Production process

Exquisite technology

Pure color, delicate texture, hard texture, simple atmosphere, simple and solemn, not easy to deform, low absorption rate, heat resistance, anti-corrosion, non-toxic, tasteless, anti-skid and moisture-proof.
